Research limits and official sources

Scope: Business, farm, graduate-entrepreneur and corporate provincial / territorial pathways. Federal Start-Up Visa, self-employed federal programs and general work permits are outside this comparison.

Money: All amounts are Canadian dollars. Investment is eligible business expenditure; net worth is assets minus liabilities; liquidity is readily available assets; a deposit, application fee and non-refundable contribution are different obligations. Do not add investment and net worth as if both were separate fees.

Minimum columns: Numeric columns show the lowest stated threshold for the profile, subject to location and sector qualifications in the next column. No fixed minimum does not mean zero capital is needed. n.a. means no current new-applicant threshold because the route is closed or absent.

Budget: Figures exclude federal charges, language tests, credential assessments, verification, professional fees, travel, settlement costs, working capital and costs required by the business plan. Provincial fees are principal-applicant amounts unless noted.

Language and qualifications: CLB is the English benchmark; NCLC is the French benchmark. Yukon publishes test-level wording. ECA means educational credential assessment; PGWP means post-graduation work permit.

Research limits: Some official pages could not be opened directly during the October 21, 2026 review: the Nova Scotia fee notice and entrepreneur guide, Newfoundland and Labrador, Northwest Territories, Yukon, Ontario and the IRCC page. For those entries, official indexed content, a government-hosted mirror or an official report was used and is identified in the source list. Confirm these entries against the official source before relying on them. Manitoba interim and pilot intake, the Manitoba Farm Investor deposit agreement, the Yukon application fee and accepted test equivalencies, and NWT agreement-specific obligations should be confirmed before any transaction or application.
